EDUCATION

M.Sc., Computer Engineering
Kremenchuk M. Ostrohradskyi
National University · 2015–2021

LANGUAGES

English Intermediate+ · B1–B2
Ukrainian Native

PROFILE

Senior Laravel developer with 10+ years building scalable web applications, SaaS platforms, REST APIs and complex business systems. Deep expertise in application architecture, performance optimization, database design and third-party integrations — maintainable, high-quality code built on clean-code principles, SOLID, design patterns and TDD. Backend-first, I own the hard parts end to end, read unfamiliar codebases fast and ship business value without breaking what works.

EXPERIENCE

Full-Stack Developer · Newgen

Jun 2024 — Present

Full-time · Remote

- Technical lead on **Sharely**, a SaaS running Swedish joint-property associations (*samfälligheter*) — member and share-ratio registries, billing ledgers, facilities and maintenance planning.
- Own architecture and build key features end to end on Laravel + Vue 3 + PostgreSQL + Redis + Docker.
- Drive query and schema design for correctness and performance — bulk, set-based work; no N+1.

Senior Laravel Developer · Freelance

Jul 2023 — Jun 2024

Contract · Remote

- Delivered backend and full-stack features across several client products on Laravel and modern PHP.
- Designed REST APIs and third-party integrations; refactored legacy code into tested, maintainable architecture.

Senior Web Developer · Svitla Systems, Inc.

Dec 2021 — Jul 2023

Full-time · Remote

- Senior engineer on international client projects across varied domains and stacks — Laravel back ends, data-heavy delivery.
- Contributed to architecture and code quality through reviews, performance work and integration plumbing.

Full-Stack Developer · SBase Web Development

Oct 2017 — Dec 2021

Full-time · Kremenchuk, Ukraine

- Built startup products from scratch and supported existing projects on Laravel / PHP.
- Implemented new functionality with company mentors, then grew into **mentoring new developers**.

Senior Full-Stack Developer · Easy SEO

Mar 2021 — Nov 2021

Part-time · Remote

- Built e-commerce and CRM projects from scratch on Laravel + Vue.js; refactored legacy code and shipped new features.

Full-Stack Developer · Gyant

Feb 2020 — Dec 2020

Full-time · Remote

- Extended an existing product on Symfony + AngularJS; implemented new functionality and refactored legacy code.

Frontend Developer · PROFVEST

Sep 2016 — Oct 2017

Full-time · Remote

- Built pages, styles and new functionality with HTML, CSS, Bootstrap and jQuery — where I learned structure is a decision.
